

**For a Disappearing Door
that comes as standard,
there's only one option.**

● **OB SERIES** ● **OS SERIES**

Convotherm is the only company in the world to offer our patented **Disappearing Door** system as a standard feature on all our combi-steamers. Which means you'll have more freedom to move and less chance of accidents, even in the smallest kitchens.

Other new features include Convotherm's **Advanced Closed System**, standard on all models, and now with **Crisp & Tasty** for crispier, more succulent results. **Press and Go** controlled programming (optional on OS Series) gives you 100 pre-installed recipes and 8 individual programme buttons for consistent cooking time and again.

If you need further proof that the new Convotherm is better than ever, consider this. With all its extra features, and a thicker stainless steel construction, it's around 25% heavier than its nearest rival. So you get more for your money, whichever way you look at it.
